

MONTHLY Market Review

Market Review

Stock markets were off to a good start in 2020 but fear of spreading coronavirus from China curbed the enthusiasm and some stocks declined. Safe-haven assets like Treasuries and gold rallied in the face of uncertainties.

Source: Morningstar

US equities once again led the charts and were flat for the month while international stocks suffered more severe losses. Emerging markets at the center of the coronavirus concern lost -4.7% for the month. Developed international equities were not spared either and fell -2.1%.

Within US stocks, there was notable dispersion in sector returns. Utilities, a defensive sector, was the best performer and up by 6.7% as reactionary investors sought safety. The Technology sector also posted positive returns led by strong earnings and gained 4.0%. On the other hand, the Energy sector was the worst performer and down by -11% as oil prices collapsed. The recent trend across growth and value also continued as large-cap growth stocks outperformed large-cap value stocks by 4.4%.

In fixed income, as investors sought safety, bonds outperformed stocks for the month. US bonds gained 1.9% while emerging market bonds and developed international bonds also gained 1.5% and 0.8% respectively.

As interest rates fell, US REITs gained 1.3% for the month.¹ Geopolitical tensions and uncertainty from coronavirus contributed to a sharp surge in gold, with gains of 4%. Slumping oil prices were mostly responsible for the steepest decline of the month as Commodities fell -7.4%.

Relative to a globally balanced (60/40) stock/bond index, exposure to emerging market equities and commodities hurt portfolio returns while diversification into REITs and gold helped for the month of January.
